The gate to the meme world

INTRODUCTION

After several years of development in the crypto world and the world at large, several coins have been developed with lower fees than that of Bitcoin.

This has provided a leverage for those with little capital an avenue to invest into the crypto world.

Doge coin and ShibaInu are two coins which have a good road map and great plans for their holders with great future plans.

What's new?

ShibaMini is going to pay ShibaInu and doge holders at each transaction.

Interestingly, it has low fees of 5% ,which simply means that the fees you pay(increment) only applies to sending to shibainu and doge holders.

ABOUT SHIBAMINI

ShibaMini: The gate to the meme world

We market, vote, rank, pay, recruit, reward in memecoins.

‘Everything coin and token is an expensive joke and joke is expensive via crypto’ – ShibaMini CEO.

ShibaMini (π Shib) official chat: <https://t.me/SHIBAMINI>

ShibaMini github profile: <https://github.com/ShibaMini>

WHO WE ARE

A Decentralized Meme Token that Evolved into a vibrant ecosystem, our goal is to push the decentralized banking system and incentivize the peace between ShibaInu and Doge coin.

In the contract, it can be seen that transactions is per with more user base for shibaMini. So each transaction resulted to give two new holder for shibaMini each time, a shiba inu and doge holder receives shibaMini as a symbol and unifying factor for peace.

The sale on the part of this holders simply gives us more burn rate as 1% on each transaction is auto burn and the team has more room to burn more out of the 0.9% they receive.

CORE VALUES

HIGH SALES VALUE

There has never been a token with such a high sales fee, despite a massive demand from the crypto community to invest in such a token. We all are tired of the constant pump and dumps and we want to find and grasp those true long-term gems.

We strongly believe that our sales fee combined with the Operation model of this token is what makes us special.

SHIBAMINI PROJECT

ShibaMini is a Binance Smart Chain deflationary and stake-able version with Decentralized Smart Contract Ecosystem.

It is powered by automated taxing protocol under Bsc. We have implemented a 3% tax on ever (Buy/Sell/Transfer) transaction.

We are aiming to build two foundations on crypto currency such as Binance (limited supply) + (forking Ethereum Ecosystem)

The gate to the meme world

ANTI-WHALE MECHANISM

Anti-Whale mechanism: This is the mechanism shibamini puts automatic into the wallet to make sure that not one individual buys up all the supply.

In case of Mass sale of ShibaMini, will the project die?

That question should come along with a situation and the smart contract has been built to allow for 0.9% on each transaction to be available to the projects team to bootstrap burn, marketing, listing, and development as the need be.

For all you know, our weekly burn will drastically reduce the supply and our desire to go multichain will make sure no one chain have monopoly of the market.

TOKENOMICS

Token name: ShibaMini

Token ticker: π Shib

Total Supply: 10Billion

Circulation: 80%

Transaction fee 5%: 2% auto liquidity. 1% burn, 1% reflection.

0.005% to a random shiba holder and 0.005 to a random doge holder.

[0.4% donation, 0.5% to the entire team's wallet.] = (0.9%) Just to one wallet on each transaction.

Anti-whale to be set by the Developer

Out of 80% circulation:

40% to exchanges.

10% marketing.

10% to owners and 10 team.

10% to development.
